

Highly motivated software developer / Engineer that one day wants to work in the game industry and travel the world. In the meantime, I intend to work hard and learn everything I can to grow as a software developer and contribute to the organization's development needs. Because of my previous job experience, I have become very adaptable to an ever-changing environment, paying attention to details, and keeping good communication with others to get work done quickly and effectively.

Skills: [Ruby on Rails](#) [Python](#) [Javascript](#) [HTML](#) [Flask](#) [ReactJs](#) [TDD](#) [OOP](#) [Agile Development](#) [ActiveRecord](#)
[PostgreSQL](#) [GraphQL](#) [RSpec](#) [Git](#) [TravisCi](#)

Projects

Pack Smart

[Pack-Smart/pack-smart-be](#) [github.com/Pack-Smart/pack-smart-be](#)

Web application that helps users pack smartly for a trip and gives them item suggestions for said trip based on a small survey of the location and activities the user will partake in.

SQLAlchemy, Python, PostgreSQL, Pytest, Flask, Heroku

Carbon Knight

[carbon-knight.herokuapp.com](#) [github.com/Carbon-Knight/carbon-knight-back-end](#)

Application where a user is able to input their travel data and see what their unique carbon footprint is over time.

JavaScript, HTML, Ruby, Ruby on Rails, Sinatra, GraphQL, Heroku

BlackJack

[black-jack-card-game.herokuapp.com](#) [github.com/kevxo/blackjackv2](#)

Web application made for the Mintbean Hackathon that allows you to play blackjack online against the computer

HTML, Ruby, Ruby on Rails, Heroku

Roberto Basulto Personal Site

[www.robertobasulto.com/](#) [github.com/Eternal-Flame085/Roberto-Basulto-Site](#)

This is my portfolio website that I built using React, it was the first time I worked with front-end technologies that did not involve Rails and the first time I got to use Javascript, so it was a good learning experience for me.

CSS, HTML, JavaScript, MaterialUI, ReactJs

Viewing Party

[viewing-party-13.herokuapp.com](#) [github.com/Stearnzy/viewing_party](#)

Viewing-Party is a website for creating movie watch parties created by users, for users. A user looks for and creates a room where they can invite friends to watch the movie together.

ActiveRecord, Ruby, HTML, PostgreSQL, Heroku, Ruby on Rails

Education

- Turing School of Software And Design** Sep 2020 to Mar 2021
Certificate, Back-end Engineering
2,530 experienced hours of programming
Worked on many real world applications in Rails, Sinatra
- Miami Dade College** 2017 to 2019
Database Management/Game Development
Relevant courses: C++, Java, Database Administration

References

Miguel Silva (Sr. Software Engineer) Business Alliance Financial Services

Roberto is a very self-motivated developer that is not afraid to tackle problems on his own. He has a strong sense of ownership in all his projects and has the grind that takes to become a great engineer. He is not afraid of getting his hands "dirty" and his knowledge does not match what is on paper for sure!
