PROJECTS

"POLY" SYNTH

[Deployed Site](#) | [Github](#)

Technologies: React, GSAP, WebGL, Tone.js

one week group project focused on incorporating new technologies into a unique React Application. This interactive application is both an auditory and visual experience that was created by utilizing the Web Audio API in tandem with various animation technologies.

RANCID TOMATILLOS

[Deployed Site](#) | [Github](#)

Technologies: React, React-Router, CSS, Cypress

Two-week paired programming project to develop a React application for browsing an API-fed movie list. Fetch movie details by clicking or searching for a title.
