PROJECTS

SWEATER WEATHER solo

TECH STACK: Ruby on Rails | PostgreSQL

TESTING: RSpec | WebMock | VCR

API: Mapquest | OpenWeather | Unsplash

Aggregate multiple external APIs to build backend API; multiple endpoints allowing users to obtain forecast data, trip details, images of destination city and travel time. Implement OAuth. Developer empathy continually at forefront with easily decipherable code, as well as needs of FE in mind while developing endpoints

MASTERMIND paired

TECH STACK: Ruby

TESTING: MiniTest

Implement a REPL interface for playable build of game classic, Mastermind. Overcoming challenges included new concept of pair-programming; resulting in strengthened communication and introduction to/practice in learning concept of legacy code
