Tools & Workflow: Git | GitHub | Agile | Figma | Heroku | Adobe Creative Suite

Other: Empathy | Leadership | Relationship Building

PROJECTS

COMIC CACHE (Group Project) - [GitHub Repository](#) - [Deployed Site](#)

REACT | CSS | CYPRESS | PROGRESSIVE WEB APP

Comic Cache is a comic book viewing application. Weekly top 10 comics data is fetched from the New York Times Bestseller API, to display the latest and most popular comics. Users can add a comic to a reading list, and have the option to purchase a comic via an external link. As a group, we were tasked to learn a new technology. This application utilizes Progressive Web App technology, where users can open the application on their phone to have a similar experience to a Native app.

RANCID TOMATILLOS (Paired Project) - [GitHub Repository](#) - [Deployed Site](#)

REACT | CYPRESS | CSS

Rancid tomatillos is a movie rating application, where users can view a list of movies, search for a specific movie, and view more details about a movie. It was intentionally designed to have a clean, simple look, intended to be intuitive and comfortable to navigate, and fully accessible. Test Driven Development with the use of Cypress, deployed using Heroku.

EXPERIENCE

Account Manager

Queen City Collective Coffee | Denver, CO | *December 2019 - January 2021*

- Established and maintained relationships with existing and future wholesale accounts.
- Excelled at exceptional customer service, quick responses, thoughtful troubleshooting, and honest and clear communication.
- Kept information well organized and tracked for greater results.
- Handled email correspondence with accounts, assisted in quality control, equipment check-ins, calibrations, and working in the field with baristas and cafe managers.

EDUCATION

Turing School of Software & Design

December 2019 - January 2021

ACCET accredited 7 month immersive Front-End Engineering program.
