SUMMARY

Merging a background in management with software design, my goal is to create the most intuitive and fluid user interfaces to help people get where they need in the easiest and most engaging way possible.

Projects

Career Day

- Made using React Hooks, Sass, Jest
- A mobile first application made to help young students find interesting careers

Who's That Pokemon

- Created with React Hooks, Sass, Jest
- A game and pokedex emulating the look and feel of the original pokemon games

Crate: Profile Feature Set

- Implemented with Redux, Bootstrap, Jest
- A feature set that allows a user to customize their profile and check on existing orders
