## PROJECTS

### Walk Safe

**URL:** [walk-safe-frontend.herokuapp.com/](https://walk-safe-frontend.herokuapp.com/)

**Github:** [github.com/Walk-Safe](https://github.com/Walk-Safe)

A personal security application to empower individuals on their walks alone, this full stack application created with an agile workflow leverages a Geolocation API and SMS Messaging API to alert users contacts from trip start to trip end.

Technologies: GraphQL, Apollo, React, React Router, React Hooks, JavaScript, GoogleMaps API, Twilio SMS API, Heroku, Cypress testing

### Space Truckers Depot

**URL:** [abrasive-honey.surge.sh/](https://abrasive-honey.surge.sh/)

**Github:** [github.com/cmeubanks/spacetruckerapi](https://github.com/cmeubanks/spacetruckerapi)

A full stack application and self taught database technologies. Space truckers can find jobs to book and view all booked jobs on a separate page view. Once a job has been completed, user can delete the job.

Technologies: PostgreSQL, Postico, Knex, ExpressJS, React, React Router, JavaScript, Heroku, Cypress testing

### Rancid Tomatillos

**URL:** [tomatillosrancid.herokuapp.com/](https://tomatillosrancid.herokuapp.com/)

**Github:** [github.com/cmeubanks/rancid-tomatillos](https://github.com/cmeubanks/rancid-tomatillos)

This front-end application displays movie posters, and when a poster is selected the user is navigated to a new view with additional movie details. Software testing implemented with Cypress.

Technologies: JavaScript, React, React Router, SASS, Heroku, Cypress testing

## TECHNICAL SKILLS

JavaScript

HTML

Apollo GraphQL

React

CSS

Express JS

React Hooks

Cypress

Slack

React Router
