

PETER MUELLERLEILE

SOFTWARE DEVELOPER

PERSONAL SUMMARY

Front-end software developer with a restaurant industry background and a life-long passion for learning and problem-solving.

Adept at critical-thinking in high-pressure situations, with strong interpersonal skills and an aptitude for collaborative team dynamics.

EDUCATION

FRONT-END ENGINEERING CERTIFICATION

Turing School of Software & Design
Denver, CO | anticipated August 2021

BACHELOR OF ARTS, POLITICAL SCIENCE

Gustavus Adolphus College
St. Peter, MN | 2008

TECHNICAL SKILLS

JavaScript ES5/ES6 | HTML5 | CSS
React | Redux | Hooks | Router
Sass | UI/UX Design | Git/GitHub
TravisCI | Cypress | Mocha & Chai

PROFESSIONAL SKILLS

Object-Oriented Programming
Test-Driven Development
RESTful API architecture
Paired & group programming
Modular directory structure
Responsive UI/UX design
User accessibility
Developer empathy
Project board management

PROJECT PORTFOLIO

"WALK SAFE" [React](#) | [GraphQL](#) | [Apollo](#) | [Twilio](#) | [GooglePlaces API](#)

[Deployed Site](#) | [Project Repository](#) | [Assignment Specs](#)

Final Turing "Capstone" project, built asynchronously with a full-stack team.

- A personal safety app that allows a user to plan a trip home using the GooglePlaces API, receive an ETA via Apollo/GraphQL fetching from the back-end using the GoogleMaps API, and to notify contacts of their trip status using automatic SMS messaging.

"HOOKSHOT" [React](#) | [Hooks](#) | [Router](#) | [Sass](#) | [NES.css](#) | [Cypress](#)

[Deployed Site](#) | [Project Repository](#) | [Assignment Specs](#)

A solo project to build a React application for a "niche audience" in six days.

- A *Zelda* "digital field guide" using RESTful API data fetching, filtering, and conditional rendering to provide users with data catered to their specific in-game "goal" and map location, with an interactive and intuitive UI/UX design and dynamic URL routing.

"RANCID TOMATILLOS" [React](#) | [Router](#) | [Sass](#) | [Cypress](#)

[Deployed Site](#) | [Project Repository](#) | [Assignment Specs](#)

A two-week paired programming project to build "movie library" web app with React.

- A web app incorporating hosted API data to fetch, display and navigate a collection of movies, with each library element routing dynamically to a corresponding "movie info" page.
- Featuring mobile-first responsive design and end-to-end integration testing using Cypress.

EXPERIENCE

MANAGER, BARTENDER, SERVER

Lady Jane | Denver, CO | 2019 - 2021

- Demonstrated adaptability by rotating frequently between positions and embracing leadership opportunities, accepting a management role during the pandemic in an effort to reopen the business safely for all employees and patrons.
- Developed numerous administrative materials and operational resources, constructing or contributing to various staff training and house recipe compendia.

BARTENDER & SERVER

Popol Vuh & Centro | Minneapolis, MN | 2018 - 2019

- Exhibited versatility by working on both halves of a bifurcated restaurant during its first year of operation, requiring a high degree of resourcefulness and self-reliance.
- Applied strong information retention skills, quickly developing proficiency in a specialized and proprietary culinary program and communicating product knowledge to a wide-ranging customer base.

BAR MANAGER

Revival Bar & Kitchen | Berkeley, CA | 2016 - 2018

- Conceived and implemented an imaginative and original beverage program, generating an increase in business while substantially reducing inventory size and product costs.
- Executed all hiring, training, and supervision of an 8-10 person bar staff, augmenting overall performance and job retention while reducing labor costs to levels consistently below 15%.
- Cultivated an environment of collaboration and individual growth by mentoring less-experienced employees and hosting periodic all-staff trainings and educational seminars.

VOLUNTEER WORK

EMPLOYMENT SERVICES VOLUNTEER

AmeriCorps VISTA | Wilder Foundation | St. Paul, MN | 2008 - 2009

- Contributed to sustainability of the *Minnesota Prisoner Reentry Project* by bolstering community reintegration services for recently-incarcerated individuals.
- Developed various job assistance preparation and placement resources to the offender population in an effort to combat recidivism and cyclical poverty in Minnesota.
