General Manager | 2015 - 2017

- Created and implemented weekly SOP's
- Worked closely with marketing department for 20+ events
- Solution-based management to better operations
- Hiring/Onboarding for over 50 employees

RECENT PROJECTS

GENz2a

[github repo](#) | [deployed site](#)

This project had a very short time frame, will need to pack a lot into a small space. I practiced developing user personas to fit a niche market, and was given a chance to show off my React skills, and experimented with using a component library.

Hue Pic It

[github repo](#) | [deployed site](#)

Paired Programming - Created a single-page app utilizing React and Google Firebase. The goal of this project was to implement new and unfamiliar technology in a short period of time. We had a blast learning user authentication and honing our skills with React.

EDUCATION

Turing School of Software and Design

Front End Software Engineering | 2020-2021

Full-time student at a nationally accredited fully immersive software development program focused on building the "client-side" of applications that are accessible to all users and efficiently process large and complex data sets.

Villanova University

Human Resource Management Certificate | 2017

TECHNICAL SKILLS

- JavaScript / ES6
- CSS3 / SASS
- HTML5
- React / React Hooks
- Apollo / GraphQL
- Git / Git Workflow
- Responsiveness / Accessibility
- UX / UI
- TDD
- Unit & End to End Testing (Cypress/Jest/Mocha+Chai)
- PWA
- Redux
- Continuous Integration

CURRENTLY LEARNING

- Next.js
- PostgreSQL
- Express.js
- TypeScript

LEARNING INTERESTS

- D3
- Flutter / Swift / React Native
- Angular/Vue
- AWS
- Ruby on Rails
- Python
