

experience

Full Stack Engineer | Theorem LTS

March 2021 – current

- Developing a suite of apps for an Enterprise Software Marketplace
- Restructured subscription model to decrease client friction and increase revenue

Front End Development

Turing School of Software & Design

March 2020 – November 2020

- Formally studied software development
- Coded on remote teams for 7 months
- Successfully implemented at least 6 new technologies in as little as two weeks each
- Led team retrospectives

Audio Engineer

contract & freelance

January 2016 – Current

- Operated systems with hundreds of artists, venues, and production teams, often as the only technical hand
- Consistently found innovative ways to solve problems and demonstrated reliable troubleshooting – often under deadlines within the hour
- Practiced strong verbal communication to create solid customer experiences with cross-functional teams and clients
- Mentored other engineers of all skill levels

|---------------------|-----------------------|
| HTML5, CSS, SCSS | Apollo, Postgraphile |
| JavaScript, ES5/ES6 | Express, Knex, NodeJS |
| Typescript | Firebase, Algolia |
| React, Hooks, Redux | Progressive Web Apps |
| Jest, Mocha, Chai | Git, Github |
| GraphQL, Postgres | Heroku, Vercel |

education

Turing School of Software & Design
Front-End Web Development

projects

Mixdup | [Live](#) – [FE Code](#) – [BE Code](#)

This Progressive Web App is for making weekly playlists with friends to find new music. Users can vote on their favorite songs each week to prove they have the ultimate hipster clout.

- *Please refresh after first-load – The back end is hosted on Heroku and takes a moment to boot up*
- Integrated with Spotify both on the server-side and on behalf with the user's account in the client
- Uses Firebase authentication and currently consumes a Firebase Realtime database

Feral Suits | [Live](#) – [Code](#)

This rock bands site includes recordings & show dates

- Dynamically renders components with schema-markup to increase SEO
- Strongly typed for an eventual addition of GraphQL and React Admin

Hire Up | [Live](#) – [FE Code](#) – [BE Code](#)

This site creates a space for employers to match with job seekers based on skills and values without character bias.

- Designed and executed in collaboration between two teams remotely
- Selected for Turing's December 2020 Demo Competition

Roasted Tomatoes | [Live](#) – [Code](#)

This is a replication of Rotten Tomatoes that demonstrates a strong React UI and high quality asynchronous integration testing

- Integrated with Spotify both on the server-side and on behalf with the user's account in the client

University of Denver

B.A. English Creative Writing & Audio
