

TYSON MCNUTT

(775) 340-3156 • tyson.mcnutt@gmail.com • LinkedIn: tysonmcnutt • GitHub: tysnj

Excellence driven front-end developer with experience in SaaS operations, leadership, and customer service. Utilizing strong curiosity and collaborative skills for a team that emphasizes great development practices.

SKILLS

JavaScript	HTML5	OOP / TDD	UI / UX Design
React	RESTful APIs	Git / Github	Workflow Design
CSS3 / SASS	GraphQL / SQL	Agile Processes	Data Integration

TECHNICAL PROJECTS

Front-End News | Technologies used: React, React Router, Styled Components, Cypress

- Having less than a week to build, this solo project demonstrates ability in implementing asynchronous JavaScript, React fundamentals, and end-to-end testing in a multiple page application
- With strong emphasis toward user first approach to design; this website provides news stories curated towards front-end technologies, allowing users to bookmark and/or mark articles as read

Web Browser Synthesizer | Technologies used: React, React Router, WebGL, GSAP, Cypress

- Group project focused on implementation of self taught technologies outside the Turing curriculum
- Within a week, built an interactive synthesizer that engages users in music creation while providing both auditory and visual feedback utilizing the Tone.js and Three.js libraries

Mock Movie Ratings App | Technologies used: React, React Router, React Testing Library, Cypress

- Two-week long paired programming project based on a Rotten Tomatoes/IMDB/Netflix fusion
- Focuses on creating responsive React applications with both end-to-end and unit testing suites

WORK EXPERIENCE
