Database Design & Troubleshooting

Professional Experience

TEAMSAP | Boulder, CO | December 2020 - Current

Frontend Software Designer/Developer

Provided technical support and assistance in transferring the TeamSnap.com Marketing site from a statically rendered site to a dynamically server-side rendered site using Next.js and GraphQL.

- Assessed client needs and requirements and improved productivity by maintaining qualitative operating conditions of all infrastructure, hardware, and network devices.
- Worked with a lean marketing team to move their tech stack by combining 2 legacy PHP Content Management Systems, a ruby backed site, and flat files to a new tech stack leveraging next.js in under 2 months
- Used a mixture of GraphQL and native node APIs to dynamically create a site that publishes over 3500 pages to production

121 FEDERAL CREDIT UNION | Jacksonville, FL | October 2017 - July 2018

IT Service Desk Analyst

Provided technical leadership, guidance, and level one computer support and service to over 250 company personnel

across the greater Jacksonville Metropolitan. Closely aligned with operational policies, practices, and procedures.

- Assessed client needs and requirements and improved productivity by maintaining qualitative operating conditions of all infrastructure, hardware, and network devices.
- Ensured the highest level of customer service while working in compliance with laws and regulations in business ethics and standards, electronic communications, and confidentiality.
- Handled administrative, operational support, and IT functions, including weekly meetings, network maintenance, and customer service from an office/telework setting.

UNITED STATES NAVY | Various Locations | June 2010 - May 2017

Information Systems Technician Second Class

Provided advanced technical support as SharePoint manager of 35 Work Sites across the Southeast network. Planned and delivered outstanding service to 3.5K+ customers across seven states.

- Delivered exceptional client service by updating, maintaining, and servicing 32 Windows OS desktops, 14 printers, and 53 peripheral devices with a 99.99 percent uptime.
- Supported multiple office locations with helpdesk assistance including but not limited to troubleshooting, repairs, support on operating systems, and instruction on Microsoft Office Suite applications to 40+ full-time personnel.
