### ABOUT

My experience as a professional athlete, being a part of many teams, building community and the desire for creating solutions has led me to pursue the possibilities within the software engineering world. I desire to be a part of teams that focus on creating solutions for positive environmental and social impact.

### PROJECTS

#### MY SOLAR GARDEN

An impact driven app to support you in helping keep our planet thriving. It all starts with healthy soil, and that's what we will help you learn how to cultivate.

- Used Service Oriented Architecture design pattern for scalability
- API consumption
- OAuth for authentication
- Feature, Request, Service and Facade testing
- RSpec, Active Record, Ruby/Rails, PostgreSQL, Heroku

#### VIEWING PARTY

An application that allows you to explore movies and create a viewing party event with friends.

- MVC design pattern
- API design and software architecture
- Feature, Facade, Service, Model and Poro testing
- RSpec, Ruby/Rails, PostgreSQL, Heroku, HTML/CSS, Bootstrap

### EDUCATION

BACHELOR OF ARTS, MAJOR IN COMMUNICATION  
Western State University

### EXPERIENCE

#### BACKEND ENGINEERING

Turing School of Software & Design

- Agile workflow
- Team collaboration in groups ranging from 2 to 13
- API and Service Design

#### PROJECT MANAGEMENT

Quantum

- Assisted in website projects
- Client point person and QA
- Weekly client status reports
