PROJECTS

[Web Browser Poly Synth](#) | [GitHub Repository](#); [Deployment Site](#)

Built with React, React Router, WebGL, GSAP, Cypress

- Group project focused on implementation of self taught technologies found outside the Turing curriculum.
- Within a week, built an interactive polyphonic synthesizer that engages users in music creation while providing both auditory and visual feedback by utilizing the Tone.js and Three.js libraries.

[ForeFinder Tee Time Planning](#) | [GitHub Repository](#); [Deployment Site](#)

Built with React, React Router, Styled Components, Cypress

- This capstone project, built in less than 3 weeks, provided experience working with a full-stack team.
- Progressive web application that helps golfers coordinate tee times with their friends and community.

[Front-End Focused News](#) | [GitHub Repository](#); [Deployment Site](#)

Built with React, React Router, Styled Components, Cypress

- Having less than a week to build, this solo project demonstrates ability in implementing asynchronous JavaScript, React fundamentals, and end-to-end testing in a multi-page application.
- With strong emphasis toward user first approach to design, this website provides news stories curated towards front-end web development tech, allowing users to bookmark and mark articles as read.

EXPERIENCE

[Platform Operations Specialist & Support Manager](#) | [Wazee Digital & Veritone, Denver CO](#) 2015 - 2021

- Led the technical support team in service across multiple company offerings and business verticals from early stages of product adoption throughout the remainder of the customer lifecycle.
- Scaled product support coverage from two services to over seven various company offerings.
- Liaised between customers, development teams, service vendors, and business partners to implement feature improvements, product bug fixes, and custom solutions.
- Provided professional services and technical consultation to customers and customer facing teams.
- Configured data ingestion pipelines, cloud storage solutions, and processing workflows for customers.
- Contributed to internal process documentation and created video tutorials for custom software.

[Media Specialist & Colorist Assistant](#) | [Laser Pacific & Technicolor, Los Angeles CA](#) 2010 - 2014

- Managed media archival through providing quality assurance and confirmation of data integrity.
- Consistently delivered positive results against daily deadlines.

EDUCATION

[Front-End Engineering](#) | [Turing School of Software & Design](#)

- Seven-month ACCET accredited software development program with use of relevant technologies.
- Focus in pair programming with emphasis on self-bias awareness and empathetic software development.

[Audio Engineering](#) | [Conservatory of Recording Arts & Sciences](#)

- Nine-month immersive program focused on fundamentals of sound engineering and audio production.
- Three-months of internships in music, film, and television production applications.
