## Education

- Turing School of Software & Design  
*Front-End Development Program*  
*Graduated 01/21*
- Colorado College  
*Bachelor of Arts, Film & Media Studies*

## Featured Projects

- [BBQ Finder](#) - [Heroku Link](#) - [GitHub Link](#)
  - Technologies used: *React with Hooks, JavaScript, SCSS, GitHub, and Heroku.*
  - *BBQ Finder* is an application originally designed as a final project for the 3rd mod of the Turing School of Software and Design Frontend Program. It has since been fully refactored to incorporate additional React skills and a more advanced front-end design. The app's purpose is to provide a user with an easy search to find BBQ restaurants in any city in the US and favorite restaurants they'd like to try in the future.
- [DreamHome](#) (Placed 2nd in Turing Demo Competition) - [GitHub Link](#)
  - Frontend technologies used: *Typescript, React with Hooks, React Spring, Jest, CSS, GitHub, Travis CI, and Heroku.*
  - *Dream Home* is an application that aims to provide first-time homebuyers with the financial awareness needed to start their home buying journey and learn about how long it would take them to reach their goal. It is a group project including students from the frontend and backend programs. It served as a demonstration of skills learned throughout the Turing School of Software and Design program and an opportunity for new self-taught skills to be implemented for the first time.

## Clients

- [TomboyX](#) - Frontend Developer
