Turing School of Software and Design

ACCET Accredited
2021

BACHELOR OF SCIENCE

Accounting
Franciscan University of
Steubenville

PROJECTS

RAILS ENGINE (SOLO)

[GitHub](#)

Tech Stack: Ruby on Rails, PostgreSQL, RSpec

API for an E-Commerce application to consume

- Build API endpoints to expose merchant, item, and revenue data
- Integrate complex ActiveRecord ORM queries to analyze information
- Apply project management and work prioritization to breakdown the project into sections

VIEWING PARTY (PAIRED)

[GitHub](#) [Heroku](#)

Tech Stack: Ruby on Rails, PostgreSQL, RSpec, VCR, Heroku, Travis CI

Application that allows members to login and search hundreds of movies to plan a watch party with their friends.

- Consume multiple API endpoints with authentication
- Implement self-referential relationships in ActiveRecord ORM
- Continuous integration using Travis CI
- Utilize mock/stub for testing API calls

PROFESSIONAL EXPERIENCE

AUGUSTINE INSTITUTE

Assistant Controller

2019 - 2021

Senior Accountant

2018 - 2019

Staff Accountant

2016 - 2018

- Analyzed budget versus actual financials and communicated variances to department heads
- Collaborated with other team members to ensure processes were efficient and followed financial rules and regulations
- Balanced new Payroll and HR software implementations while onboarding 150+ employees in multiple states over 7 months
- Attentively balanced donations to confirm funds were properly accounted for and investigated any differences

PLATTE VALLEY COMPANIES

Accountant

2013 - 2016

- Developed an attention to detail by reconciling general ledger account
