## EDUCATION

**Elon University** Elon, NC 2010-2014 BA - Digital Communications

**Turing School of Software & Design** Denver, CO 2019-2020 - Frontend Engineering Program  
(8 months, full time)

## CAREER HISTORY

### Software Developer

*Outer Reach | Denver, CO (remote via NYC) | February 2021 - Present*

- Develop a Yoga live-streaming product based in Typescript/Node
- Update features and new designs to spec. Complete 4-5 additions and bug fix tickets per day.
- Create and deploy HTML-email campaigns via SendGrid

### Frontend Developer

*Legal Thunder | Denver, CO | September 2020 - February 2021*

- Developed and designed legal calculation products in React, in a sprint-based team.
- Maintained and made modifications to user and payment APIs in internal Ruby on Rails codebase and Stripe payment system.
- Completed and deployed allocated tickets before end of sprint on 75% of sprints.

### Freelance Developer (100% job success rate on UpWork.com)

*UpWork | Remote | Dec 2019 - Present*

- Build clients' web sites and web applications to specification, using a variety of tech stacks.
- Contracts range from week-long projects to ongoing 6-month projects.
- Strong emphasis placed on communication with clients and meeting their desired milestones at scheduled dates.

### Coding Instructor

*CodeWizards HQ | Denver, CO | Jan 2020 - Oct 2020*

- Instruct students grades K-12 in daily and/or weekly hour-long coding sessions, 20 hours per week.
- Build projects from start to finish, communicating proper syntax and architecture principles to experienced students.
- 97% satisfaction rate amongst students, frequently requested as an instructor by students taking additional classes.
- Languages taught include HTML, CSS, JavaScript, Python, and SQL-based databases.

## SOFTWARE PROJECTS

### KingsWear ECommerce Store

- Developed React web application storefront for freelance client that allows users to shop and make orders online.
- Incorporated Firebase for Google user sign-in authentication and persistent shopping cart data.
- Designed GraphQL backend enabling merchandise to be managed, updated, and stored in an online database.
- Utilized: React.js, Firebase, Apollo GraphQL, Local Data Persistence, React hooks, Stripe payment system

### Inueativ Chef Review Site

- Built out CMS microservice for freelance client's art gallery, allowing low-tech employees to update site content.
- Designed and coded UI in React using BootstrapVue components and linked with the site's CDN.
- Provided end-to-end unit testing for front end components and API operations.
- Utilized: Vue.js, BootstrapVue, Imperva CDN, Mocha, Chai, Flask, SASS, InVision

### Pkmm TCG DB

- Database site built upon the React JS framework and Pokemon TCG API, allowing users to view, filter, search, and save cards.
- Developed search algorithm to suggest new card sets and decks to users after a certain amount of usage.
- Styled UI and card displays using React and SASS.
- Fully unit tested and tested for all calls to RESTful Pokemon Trading Card API.
- Utilized: React.js, SASS, React Router, Jest & Enzyme, InVision
