PROFILE

Creative *quadrilingual* engineer with experience in Video Conferencing & Front End Engineering. Passionate about learning new technologies, bringing ideas to life, and working in teams to build efficient and robust applications that enhance client satisfaction, experience, & loyalty.

PROJECTS

WeatherApp

[Live site](#) | [Github](#)

1.5 days solo project. Full responsive PWA with an accessibility score of 100% that uses weather API. This app lets users convert temp degrees from imperial to metric and vice versa.

- Tech: Html, CSS, JavaScript, React, Github, Weather API, PWA, Netlify

Netflex

[Live site](#) | [Github](#)

1.5 week paired project. React movie web app that lets users search, watch trailers, & read about movies. With the help of Router, users can enjoy a multi-page layout and be able to bookmark certain movies they like. User flows are fully tested by Cypress.

- Tech: React | Router | User Flow Testing w/ Cypress | Html | CSS | JavaScript | GSAP animation | Heroku

Track Your Journey

[Live site](#) | [Github](#)

4 days solo project. User authenticated responsive traveler app built with vanilla JavaScript, following OOP patterns. It lets users view their past, present, upcoming, and pending trip info. They have the option to make a new trip request as well.

- Tech: Sass | webpack | Unit Testing w/ Mocha & Chai | HTML | JavaScript | Github | CSS-Grid

PROFESSIONAL EXPERIENCES

Front End Engineer

Nov 2021 - Present

Turing School of Software & Design | Denver, CO
